

Context Description: Lesotho Development Overview

This work aims at creating data analysis visuals on Lesotho based on statistical data collected and documented by international organisations including UN subsidiaries. The aim is to create data stories using data on development indicators this would include among others the Gender Inequality Index, Human Development Index etc. This document describes the structure of each analysis, and it is meant to be amended as more learning is done on the subject of presenting development data.

Data Story Template

1. Indicator Description
2. Storyline
3. Picture works
4. Data visuals

Technology Stack

1. Tableau public
2. Github

GITHub Folder Structure

Root: lesothoanalytics, project file (.tbwx)

Sub-folders:

- **data sources**(store associated data sources)
- **resources**(store any pictures or graphics associated with building the dashboard)
